**Bedphones introduces thinner, more durable design and new colors in next generation of sleep headphones**

November 18, 2015

(Chappaqua, NY) - The manufacturer of the world's thinnest on-ear headphones, Bedphones, announces today the release of Bedphones Generation 3 (Gen. 3), the newest generation of patented headphones designed for sleeping.

The Bedphones Gen. 3 design improves upon existing Bedphones Gen. 2 features, debuting thinner speakers and a thicker cable, and is available in two new color schemes (black and blue). The 23mm speakers provide exceptional comfort for sleeping, and the cables, now 30% thicker, provide added durability for users who wear their Bedphones to bed.

Bedphones Gen. 3 are up to 10% thinner than the Gen. 2 design and maintain the same great sound quality that remains a defining feature of the product.

Bedphones are ideal for use with the Bedphones mobile app, created specifically to enhance the bedtime listening experience. The app provides users with motion, time, and touch-sensitive music control, including the ability to automatically shut off music when the user falls asleep. The Bedphones Music Controller is free, compatible with all headphones, and available for Android™ and Apple® iOS mobile devices.

Eric Dubs, the founder of Bedphones, launched the company in the summer of 2011 after failing to find a pair of headphones that he could comfortably wear to bed. With a background in mechanical engineering and an entrepreneurial spirit, Dubs designed, prototyped, and launched Bedphones from the basement of his childhood home. Bedphones has since tripled in size, gaining a loyal following of customers who use Bedphones to find relief from tinnitus, insomnia, racing thoughts, snoring roommates, and restless nights.

Bedphones are available online at [Bedphones.com](http://Bedphones.com) and [Amazon.com](http://Amazon.com), and through retail outlets The Grommet, Sharper Image, and Skymall. Bedphones will also be exhibiting at the Consumer Electronics Show (CES) January 6 - 9, 2016 in Las Vegas, Nevada.
